

## BTX1 PRO S INSTALLATION

Place the **BTX1 PRO S** unit on the left side of your helmet using the adhesive mount.

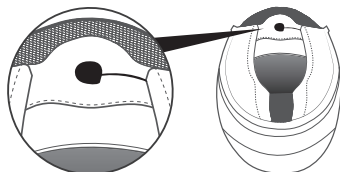

Place both speakers as much as possible close and centered to your ears. In case of need, use the provided spacers to better fit the speakers closer to the ear.

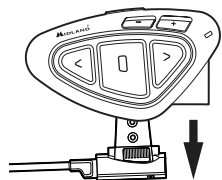

**Closed helmets:** place the wired microphone in front of your mouth.

**Jet helmets:** fix the boom on the left side and keep the sponge as closely as possible to your mouth.

The **BTX1 PRO S** can be easily fitted onto the helmet by sliding it downwards into the slot of the adhesive Mount.

To detach **BTX1 PRO S**, simply press the fixing clip (A) and push the unit upwards.
